

Choosing the authentication mechanism

- Driven by the risk analysis and the costs
 How hard is it to?
 Make you reveal your secret password
 - Make you reveal your secret password
 - Duplicate a credit card

• Fake your fingerprints

- There is no perfect authentication

Choosing the authentication mechanism

- → Driven by the risk analysis and the costs How hard is it to?
 - Make you reveal your secret password
 - Duplicate a credit card
 - Fake your fingerprints
- There is no perfect authentication

Something else to consider - usability

- How restrictive is the use of several authentication mechanisms?
- How the users will use handle and appropriate the authentication process?
